

Nova 600 SEM/FIB Terms of Usage

Reservations

- Reservations are made via the Nanolab LabRunr system or by contacting an FIB engineer.
- At your first session, you must bring the account authorization form completely filled out.
- A minimum 24 hour advanced notice for reservation changes or cancellations is required. Failing to do so will result in a charge of 1 hour against your account.

Billing

- Microscope usage is billed in ½ hour increments with a minimum 1 hour charge. Usage time will be rounded up to the nearest half hour.
- Users are required to fill out the log sheet indicating account number and usage time.
- Your billed session time begins at the start of your reservation, **NOT** when you arrive at your reservation.

Training

- There are three levels of training, each of which requires mastery of the preceding level; SEM, FIB, and TEM sample preparation. Your ability to safely and proficiently operate the system for these tasks must first be demonstrated to an engineer before solo use of the system is allowed. You do not need to be trained at all levels in order to use the system.
- Training will only be allowed for individuals who need to use the microscope on a consistent basis. Those with less demanding needs should utilize Nanolab engineers for their individual projects.
- Training on the Nova 600 system is done on an individual basis.
- Nanolab engineers have the final say regarding who should or should not be trained and whether the user may use the microscope unsupervised once they have been trained.

Acknowledgements

- We highly encourage users who publish data from the use of the Nova 600 to acknowledge the UCLA Nanoelectronics Research Facility and its engineers.
